

GLOBAL TRAVEL TRENDS & INSIGHTS REPORT

1. PROJECT OVERVIEW:

This dashboard provides specific insights into traveller trends, spending, and preferences from 2020–2024. It uses measurable KPIs like total travellers, repeat visits, and booking channels to track performance. The analysis is achievable through interactive filters and visualizations, relevant to tourism stakeholders for strategy optimization, and time-bound to the 2020–2024 travel period.

2. OBJECTIVES:

These are the objective were going to found from this analysis

- Identify seasonal travel demand patterns to optimize promotions and resource allocation.
- Assess visa preferences to streamline travel documentation support and partnerships.
- Track year-over-year growth to evaluate market expansion and long-term trends.
- Measure travellers' satisfaction and recommendation likelihood to improve service quality.
- Analyse booking channel usage to refine distribution strategies and strengthen partnerships.
- Highlight top destinations to guide marketing campaigns and investment decisions.

3. DATA SOURCES:

Time line:2020-2024.

Domain: global travel trends

4. DATA CLEANING (PREPROCESSING):

The following preprocessing steps were performed to ensure data quality:

- Handled missing values
- Removed duplicate records
- Corrected and changed data types
- Renamed columns for better readability

- Delimit the columns
- Sort and filter the column
- Ensured uniqueness across key identifiers for reliable aggregation.

TOOLS USED:

- Excel
 - Power BI (power query)
-

5. DATA TRANSFORMATION:

To enhance analysis, the following transformations were applied:

- Developed custom columns to enhance analytical depth and improve reporting accuracy.
- Derived key performance indicators (KPIs).

DAX Measures:

These are the key measures identified in this analysis

- **Total Travelers → 46K**
 - **Total Travel Spend → 115.50M**
 - **Repeat Travelers → 18K**
 - **Solo Trips → 2K**
 - **Family Trips → 11K**
 - **Average Rating → 3.94**
-

6. EXPLORATORY DATA ANALYSIS (EDA) & VISUALIZATION:

- Performed statistical analysis
- Built interactive dashboards and visualizations

Features Included:

- Filters (Slicers)
- Interactive visuals

Multiple Visualizations based on problem statement

- **Seasonal Demand Insights** → *Bar Chart*
- **Visa Preference Breakdown** → *Pie Chart*
- **Traveler Growth Trendline** → *Line Chart*
- **Recommendation Sentiment Analysis** → *Horizontal Bar Chart*
- **Booking Channel Performance** → *Pie Chart*
- **Destination Popularity Index** → *Bar Chart*
- Visualizations are designed to simplify complex travel data into clear, actionable insights.
- Each chart highlights a specific dimension (season, visa type, booking channel, destination, etc.) to support targeted decision-making.
- Interactive filters (origin country, traveller type, repeat traveller) enable customized exploration of patterns.

7. KEY INSIGHTS (SMART + ANALYTICS APPROACH):

The following KPIs were identified through the analysis.

7.1. DESCRIPTIVE ANALYTICS:

- Seasonal demand remains steady across all four seasons, providing **specific** insights into balanced travel preferences.
- Visa-Free travel dominates at 30.47%, a **measurable** indicator of accessibility shaping traveller choices.
- Traveler counts show consistent growth from 2020–2024, an **achievable** upward trend reflecting market expansion.
- Strong recommendation levels highlight satisfaction, making feedback **relevant** for improving tourism services.
- Online Travel Agencies lead at **35.36%**, a **specific** preference guiding booking channel strategies.
- France and Egypt emerge as top destinations, offering **time-bound** insights into current global travel hotspots.

7.2. DIAGNOSTIC ANALYTICS:

- Seasonal travel demand remains balanced because tourism is influenced by diverse motivations (**holidays, festivals**, climate preferences), preventing sharp seasonal peaks.
- **Visa-Free** travel dominates since travellers prefer destinations with simplified entry requirements, reducing barriers and costs.
- The steady growth in travellers from **2020–2024** is driven by post-pandemic recovery, increased disposable income, and rising interest in international tourism.
- Strong recommendation levels reflect positive experiences in **service quality, destination appeal**, and value for money, though lower ratings suggest gaps in consistency.
- Online Travel Agencies lead as the primary booking channel due to convenience, price comparison features, and widespread digital adoption.
- **France and Egypt** emerge as top destinations because of their cultural heritage, iconic landmarks, and strong global tourism branding.

7.3. PREDICTIVE ANALYTICS:

- Seasonal demand is expected to remain balanced, but Summer and Winter may show slight increases due to holiday travel peaks.
- Visa-Free travel will likely continue to dominate, with E-Visa adoption rising as more countries digitize entry processes.
- Traveler counts are projected to grow steadily beyond 2024, driven by post-pandemic recovery and rising middle-class tourism.
- Recommendation levels are expected to improve further, as service quality and digital experiences enhance satisfaction.
- Online Travel Agencies will likely strengthen their lead, while mobile app bookings are predicted to grow rapidly with younger travellers.
- France and Egypt will remain top destinations, but Asian countries like Thailand and Malaysia may gain more share due to affordability and cultural appeal.

7.4. PRESCRIPTIVE ANALYTICS:

- Strengthen seasonal campaigns by offering **holiday packages in Summer and Winter**, while maintaining balanced promotions year-round.
 - Expand partnerships with countries offering **Visa-Free and E-Visa options** to attract more travellers with simplified entry.
 - Invest in marketing and infrastructure to **sustain traveller growth beyond 2024**, focusing on emerging middle-class markets.
 - Enhance customer experience programs to **boost recommendation scores**, such as loyalty rewards and personalized services.
 - Prioritize digital distribution by **optimizing Online Travel Agency presence** and developing user-friendly mobile booking apps.
 - Diversify destination marketing by **promoting affordable Asian hotspots** like Thailand and Malaysia, while reinforcing established leaders like France and Egypt.
-

8. CONCLUSION:

The Travel Insights & Analytics Dashboard provides a holistic view of traveller behaviour, spending, and preferences from **2020–2024**. By combining seasonal demand, visa types, booking channels, and destination trends, it delivers actionable insights for tourism stakeholders. The analysis highlights steady growth, strong satisfaction levels, and evolving digital booking patterns, enabling data-driven strategies to enhance customer experience and expand market opportunities.
